¹ One set of Essix Retainers and Fixed Retainers will be provided only on the aligned teeth, which have been treated unless stated otherwise.

² Damon braces are not considered "faster" than other braces, the alignment stage is relatively faster, there is also a consideration that non-extraction is more possible with this brace.

³ Damon Clear is used in this case.

⁴ Forestadent 2D is exclusive for certain patients only, please discuss this with the orthodontist.

⁵ Incognito or WIN requires 2-3 weeks for approval prior to installation.

⁶ Only ORJ braces are used in this case.

⁷ **These require a non-refundable deposit, which is part of the total cost to allow a Clin-Check (treatment simulation) that is the pre-treatment stage.**

⁸ Vivera retainers can take up to 2 weeks to manufacture.

⁹ Only possible in well aligned arches. Please note that if you are having treatment done, retainers are included in the cost of the treatment unless stated otherwise.

¹⁰ This requires 2 weeks fabrication time and breakages and losses are charged.

¹¹ This is usually a 4-6 month treatment plan.

¹² Terms and conditions apply – please discuss with the reception team.

¹³ We recommend this before the braces are installed, every 6 months and at the end of treatment. This is done by another team member.

ALL COSTS HERE ARE VALID FOR 2 YEARS ONLY.
